

Retraction of article

Retraction: Role of phosphodiesterase in cyclic AMP signaling in cultured rat granulosa cells.

Wang Z., Pan L., Luo J., Wang H., Shi F. *Reproduction Nutrition Development*. 2006, 46:179-187.

The Editors-in-Chief of RND,

- Considering the request from Prof. Philip S. Lapolt, Department of Biological Sciences, California State University, Los Angeles, USA on April 28, 2006;
- Considering the right of reply formulated by F. Shi on May 29, 2006;
- Considering the committee of scientific experts held on the 15th June 2006,

have decided

to subject the above mentioned article to a full retraction. It appears that most results from this article were obtained in the frame of the master's thesis project of Mr Robert L. Steward performed in Prof. LaPolt's laboratory.

The authors of the retracted article did not contribute to the study. Furthermore, the results presented in the article involve the use, without permission, of scientific material covered by a Material Transfer Agreement between a private company and the California State University, Los Angeles.

Nouzilly, 16 June 2006
